04-Exercise-Day

Purple Team Exercise Day Guide

Exercise Flow

Red Team: What to Provide for Each TTP

Item	Example
Attacker IP	192.168.1.100
Target System	WORKSTATION-01
Target Account	jsmith@corp.local
Exact Time	2026-04-15 14:32:15 UTC
Command/Action	`mimikatz.exe sekurlsa::logonpasswords`
Expected Artifacts	LSASS memory access, Event ID 4656, screenshot of output

Always share screen during execution

Blue Team: What to Report for Each TTP

Metric	Description
Detected?	Yes / No / Partial
Detection Method	Alert / Telemetry / Hunt / Forensics
Time to Detect (TTD)	Time from execution to first detection
Time to Investigate (TTI)	Time to understand scope
Time to Remediate (TTR)	Time to contain/eradicate
Detection Sources Used	Which logs/tools provided visibility
Gaps Identified	What was missing — classify using Gap Categorization

Always share screen during hunt operations

Communications Checklist

Before Each TTP

- ❑ CTI context presented
- ❑ Expected controls discussed
- ❑ All participants ready
- ❑ Screen sharing enabled

During Execution

- ❑ Red Team announces start time
- ❑ Blue Team actively investigating
- ❑ Exercise Coordinator timing responses
- ❑ Notes being captured

After Each TTP

- ❑ Results documented
- ❑ Gaps identified
- ❑ Detection engineering opportunity noted
- ❑ Action items assigned

Quick Troubleshooting

Issue	Solution
TTP not working	Verify allowlists, test on non-exercise system first
No visibility	Check security tools reporting to production dashboards
Time pressure	Skip detailed detection engineering; note for follow-up
Attendee unavailable	Continue with available team; document for their review
